### Fineblanking Characteristics

- Eliminate Machining
- Form in Two Dimensions
- Reduce Costly Secondary Operations
- Achieve Excellent Flatness

QS 9000 and ISO 9002 Certified

Precision Resource is one of the largest Fineblankers in North America. We serve our customers by utilizing the most (over 100) presses in the Fineblanking industry, ranging in size from 40 through 1400 tons. Our Fineblanking capabilities are complemented by a tremendous variety of secondary capabilities, which include:

### Who They Are:

- 7 Divisions in 6 Manufacturing Plants:  
CT, CA, FL, KY, IL, Ontario
- More than 120 Fineblanking Presses
- Extensive secondary capabilities

- Cleanly sheared straight edges
- Small holes relative to material thickness
- Thin web sections
- Components made from rolled stock from 0.005" to more than 0.750" (0.13mm-19mm) thickness
