## Roll Forming

**D.C. Rollform**

### Why should you specify D.C. Rollform?

**Fast CAD design service:** We can convert your sketches or shop drawings to preliminary or finished designs in a day. This fast design service facilitates your decision-making and helps assure the most costeffective production design.

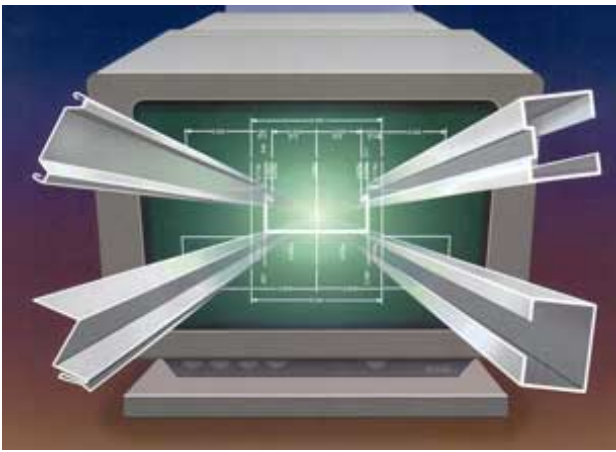

**Fast prototype response:** Design engineers look to us for prototypes— and we take pride in working closely with them until the model is produced precisely to their specifications.

### Serving Industry Throughout the US

- Aircraft
- Automotive
- Computers
- Construction
- Conveyors
- Display Cases
- Electrical
- Marine Interiors
- Medical Equipment
- Office Furniture
- Overhead Doors
- Partitions & Walls
- RR & Rapid Transit

### Rollforming a full range of metals and finishes:

- Aluminum
- Brass and Bronze
- Carbon and Stainless Steels
- Galvanized
- Precoated
- Prepainted
- Preplated
- Vinyl Coated

***Fast in-house toolmaking:*** Placing your rollform work with DCRF saves time—weeks and sometimes months. And if you believe "time is money," you'll like the savings we offer even more. You'll also like the control and precision quality we'll impart to your component. It's a value-added benefit you get from DCRE

***Fast production turnaround:*** You'll find a complete listing of our rollforming equipment on the next page. What you won't find listed is our most valuable asset: Our skilled people with their in-depth experience. They care about rollforming quality and precision. You can actually see their care in the way they work. Come and take a look for yourself.

***Fast delivery—on time/just-in-time:*** "Delivery" is much like the weather: Everybody talks about it, but.... The DCRF Difference is that we work as many shifts, as many days, as many people as we must to keep our delivery promise to you—and to keep your plant on-line.
